

MORITZ KOPPERSCHMIDT

STUDENT IN URBAN PLANNING

Introduction

I'm an outgoing and communicative student and enjoy working in a team to develop creative ideas and innovative solutions. In working processes I like to think outside the box as well as resort to well-established approaches in order to create a required outcome. My greatest strengths lie in quickly understanding contexts and their functionalities, my social skills and a curious yet critical mindset.

In the group projects during my studies, I enriched the process with organisational skills, developing new ideas and discussing and refining them. Especially in graphical tasks, my eye for details and aesthetics came in handy.

If certificates or other documents are requested, I will be happy to send them to you.

Moritz Kopperschmidt
